International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 5, ISSUE Nos 1–4

ISSUE No. 1 January–March

Editorial 1

Low Rate Encoding: A Means of Increasing System Capacity in a TDMA/DSI System: F. Fresia, A. Patacchini and C. Prins 3

Sixty Mb/s Transversal Equalizer: V. Uzunoglu 13

Selection of Gold and Kasami Code Sets for Spread Spectrum CDMA Systems of Limited Number of Users: S. E. El-Khamy and A. S. Balamesh 23

Models and Algorithms for Optimal Traffic Assignment in SS/TDMA Switching Systems: M. Minoux and C. Brouder 33

Generalized Satellite Link Model and its Application to the Transmission Plan: I. Tamir and Y. Rappaport 49

FORTHCOMING MEETINGS 57

ISSUE No. 2 April–June

(Special Issue on On-board Processing)

Editorial 59

Frontispiece 61

Introduction: P. P. Nuspl 63

On-board Processing for Communications Satellites: Systems and Benefits: P. P. Nuspl, R. Peters, T. Abdel-Nabi and N. Mathews 65

Advanced On-board Processing for User Oriented Communication System: G. Colombo and G. Pennoni 77

Satellite Communication Systems for Domestic/Business Services: G. Perrotta, G. Losquadro and R. Giubilei 85

An On-board Processing Satellite Payload for European Mobile Communications: B. G. Evans, I. E. Casewell and A. D. Craig 105

System Concept for a Digital Repeater Intended for a Future Generation of German Telecommunications Satellites: H. W. Heine 123

Real-time Configurable SS/TDMA Equipment for Second Generation French Telecommunications Satellite Project: A. Oppetit, D. Thebault and J. L. Rousson 133

On-board Processing for Communication Satellites: Technologies and Implementations: K. Betaharon, K. Kinuhata, P. P. Nuspl and R. Peters 139

Advanced Satellite Switching Centre with On-board Diagnostics: K. Betaharon, S. Kitazume, Y. Takimoto and N. Komiyama 147

SS-TDMA Switch Matrices using Optical Technology: R. A. Peters 155

Test Results for On-board Burst-mode CQPSK Modem: Y. Kazekami, H. Sawada, T. Ishizu and K. Betaharon 163

Non-regenerative Satellite-switched FDMA (SS/FDMA) Payload Technologies: P. V. de Santis . . 171

In-orbit Testing of Digital Regenerative Satellite: The ITALSAT Planned Test Procedures: E. Saggese and V. Speziale 183

FORTHCOMING MEETINGS 191

ISSUE No. 3 July–September

Editorial 193

Ku-Band Satellite Data Networks Using Very Small Aperture Terminals—Part I: Multi-access Protocols: D. Raychaudhuri and K. Joseph 195

Synchronization of Remote Digital Clusters via Satellite for ISDN: K. G. Johannsen 213

VSAT Networks—an Overview: M. Maggenti, T. T. Ha and T. Pratt 219

Dielectric Space Frame Radomes for Satellite Communications: S. Rwabona-Katashaya and B. G. Evans 227

Planning Considerations for Domestic Replacement Satellites: K. G. Johannsen 233

Some Aspects of the Analysis of Experimental Data for Short-term Frequency Scaling: S. A. J. Upton, A. R. Holt and G. J. G. Upton 249

FORTHCOMING MEETINGS 261

ISSUE No. 4 October–December

Editorial 263

Ku-Band Satellite Data Networks using Very Small Aperture Terminals—Part II: System Design: D. Raychaudhuri 265

Performance of Fully Variable Demand Assignment SS/TDMA Satellite Systems: G. Maral and M. Bousquet 279

Large/Small Carrier Performance of Non-linear Devices: G. Stette 291

Equalization for PSK Signals over Non-linear Channels with Non-symmetrical Frequency Response: A. Said, A. Elrefaie and L. Kurz 295

FORTHCOMING MEETINGS 307
